Dual Credit Options in Chemistry

There are 2 chemistry courses carrying college credit at Oregon Institute of Technology. OIT is one of 7 public 4-year universities in Oregon.

1. Newberg's first year chemistry course offers 5 quarter hours from Oregon Institute of Technology (OIT) for Intro to General Chemistry (CHE 101/104.) This course is the first of 2 chemistry courses needed for nursing, dental hygiene, and many allied medical professions. The course meets a general education requirement for many universities. Cost is $25 per credit hour, or $125*.

2. Advanced Placement Chemistry offers 10 quarter hours from OIT for Chemistry (CHE 221/222.) These courses are the first courses taken by a student majoring in science and are admission requirements for many health care programs. At this writing, these courses transfer as all the chemistry credit needed for most engineering programs at OSU. Cost is $25 per credit hour, or $225*. Students are also prepared for the Advanced Placement Chemistry exam.

*Scholarships are available for students on a lunch program.

To decide what course you want to take for college credit, do a search for a program at a university you might want to attend and find the program of study required for that course. Once you've located the science or chemistry courses needed, find the course transfer page for that course and see which of our chemistry courses meet those requirements. You can track your options in the chart below to help you make decisions.

Possible major program of study	University offering this program	Chemistry or science course	OIT course(s) meeting this requirement
