

Phylogeny of Plants

Name _____

Observe a sample of moss, fern, conifer (an evergreen tree, for example) and a plant with flowers. On the chart, make an X in the box if the plant has a particular characteristic.

	Chlorophyll	Spores	Stems and roots	Seeds	Seeds are covered
Moss					
Ferns					
Conifers					
Flowering Plants					

Then, create a cladogram using the starter, below. Remember that the plant names are written at the top of the correct line and that the squares represent characteristics.
